

GNOME and its community

Pockey Lam <pockeylam@gnome.org>
GNOME 3.0 Launch Party

Agenda

- 🐾 The GNOME project
- 🐾 The GNOME community
- 🐾 Where do you stand
- 🐾 How / why should you get involved

For users, GNOME is...

a free desktop
accessible to everyone

GNOME is...

more than just
a desktop...

So...

what are the
GNOME values?

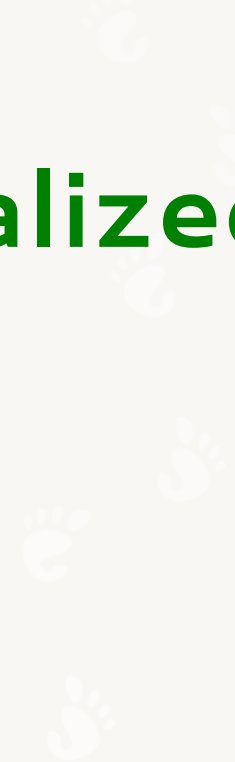

Accessible

Internationalized

Localized

Free

Usable

**Easy
to use**

A scenic view of a tropical coastline. The foreground shows a white sandy beach curving along the shore, bordered by lush green vegetation. The water is a vibrant turquoise color, transitioning to a deeper blue as it extends into the distance. The sky is a clear, bright blue, filled with large, fluffy white clouds. The overall atmosphere is serene and beautiful.

Beautiful

Moonlight on Android

For the past week, the Moonlight team has been busy porting Moonlight to Android devices and today, showed it off at [Mix 11](#).

The video shows Moonlight running on both a [Motorola Xoom](#) tablet and a [Nexus S](#) phone.

Keep in mind that we're still in the early phases of porting and there's still a lot of work left to do before we can ship a product, but it's still exciting!

Debugging sshd on N900 (after restore from backup)

I got my N900 back. The micro-USB port had broken off cleanly. Apparently that's a known thing. I brought it to a Nokia Support Centre and they fixed it in two weeks. So far for the good news.

The bad news is that, even if they only reattached a connector, they still wiped the phone itself. I had a backup from the backup application and a dirvish backup of `/home/user`

But obviously that's not enough. First of all, restoring from the backup takes a while – it reinstalled 110 apps, 20 of which stopped the installation because they feel I should click ok to install. Sigh.

Celebrate GNOME 3.0 release

- Home
- Common questions and answers
- Try it out!
- Launch parties

The next generation desktop has arrived
CELEBRATE GNOME3

For this unique occasion over a hundred people around the globe are organizing **Release parties**. You might want to take a look at the map on the left side and check if there is a party in your area.

As party dates vary based on organizer's convenience do visit the party home page and see whether the party has taken place or not. Should you have missed the party, it's never too late to celebrate GNOME 3 with a few friends and share your excitement about this new release.

And if you're alone living far way from anybody else, just visit the GNOME IRC channel on Gimpnet and party with us!

Code GNOME

The screenshot shows the GNOME Developer Center website. At the top left is the GNOME Library logo. A navigation bar contains links for 'About', 'Users', 'Developers' (which is highlighted), and 'Administrators'. A search bar is located on the right side of the navigation bar. Below the navigation bar is the main heading 'GNOME Developer Center'. Underneath this heading is a section titled '10-minute Tutorials'. This section features a horizontal carousel of tutorial cards. The first card shows the GTK logo. The second card is titled 'clutter-image-view' and shows a collage of images. The third card is titled 'Guitar Tuner' and shows a simple interface with buttons for notes E, A, D, G, and B. The fourth card shows a simple message board interface with text input fields and buttons. Below the carousel, there are three main content blocks: 'Getting Started' with a welcome message and a link to 'Download GNOME Development Tools'; 'Get ready for GNOME Development' with a link to 'Download GNOME Development Tools'; and 'API Documentation' with a list of supported languages and frameworks: GTK+ (C, C++, Python, Javascript, Vala), Clutter (C, C++, Python, Javascript, Vala), and GStreamer (C, C++).
